

Acknowledgement of fire protection regulations

Welcome to the Barclays Arena Hamburg. We would like to draw your attention to your obligation to avoid personal injury and damage to property as well as fire and other hazards in the Barclays Arena (hereinafter BA) and on the entire premises. In doing so, you must comply with the general guidelines and instructions as well as the valid general terms and conditions, house rules and fire protection regulations of BA and the relevant BG regulations (BGV's) and support and monitor all measures serving the occupational safety and health protection of all employees.

Please remember that the BGV's also apply to employees of foreign companies whose employees do not belong to any trade association in Germany!

Before starting work, contact the BA production manager in charge, who is responsible for the mutual coordination of the work and is authorised to issue instructions to you in matters of occupational safety.

In addition to the general duty of care, we would like to point out the following points once again:

- 1) New employees who are unfamiliar with the area must be instructed in BA's fire safety regulations on site.
- 2) Access routes for the fire brigade must be kept clear without exception. Parking in front of hydrants, driveways, gates or similar narrow spaces is not permitted.
- 3) The parking or storage of objects of any kind on access routes for the fire brigade and escape routes as well as the blocking of the free space of these routes is not permitted. Other paths must always be kept clear. Objects parked or stored in the immediate vicinity of paths must be secured against falling over.
- 4) Safety signs, safety and information signs on the premises, e.g. prohibition and instruction signs, warning signs, signs for rescue and first aid, must be observed and may not be removed.
- 5) Damage and malfunctions to our facilities must be reported immediately.
- 6) The required personal protective equipment (e.g. head or foot protection) must be worn during work!
- 7) Fire barriers may only be opened after prior approval. Opened fire barriers must be closed again professionally immediately after completion of the work.
- 8) The posted escape and rescue route plans must be observed.

Your employees or those commissioned by you have been instructed in the contents of this information sheet and the fire protection regulations of the Barclays Arena.

The house rules and the fire protection regulations can be inspected at Arena Control if required.

Only instructed persons may be deployed on site.
